"wordo"

1.1

using imagery to help isolate the sound
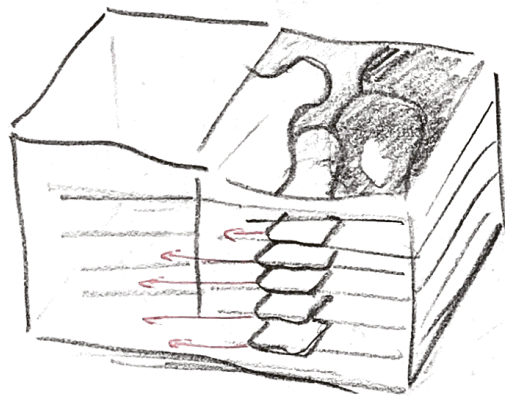

word

word

moving the tab will isolate the image to help isolate the sound
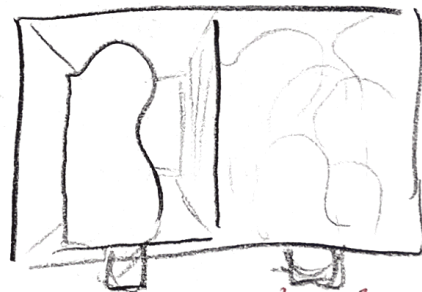

1.2 { using a list of words to isolate the sound

② TOY / puzzle: Collage of unintelligble images & the user can push/pull a tab that will isolate the image from the rest of the collage.
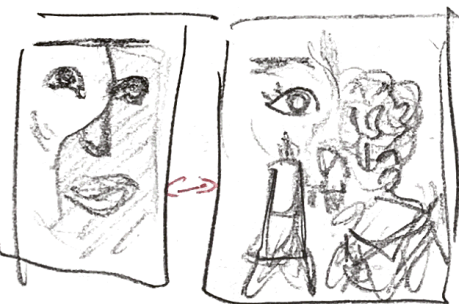

Top View

→

Slide the tabs to isolate the image!

Tab that isolated an image / card.

↳ Sliding the tab to reveal the image will make it make sense

3D

"WORD MASTER"

The Eyes

The Cogs

↳ Front view of "Word Master"

↳ Viewers will look into the eye holes and see three layers of clear acrylic with strange symbols written on them.

↳ Viewers will turn the cogs of acrylic & see that some letters can appear.

↳ Seeing this occur the viewer will want to keep turning the cogs to reveal words or discover new ones.

This is now... 2D?

Deconstruction of words

Between the three cogs, the words will be split so it looks unintelligible turning the cogs will align the words & make it readable

2D Puzzle similar to 3D piece.
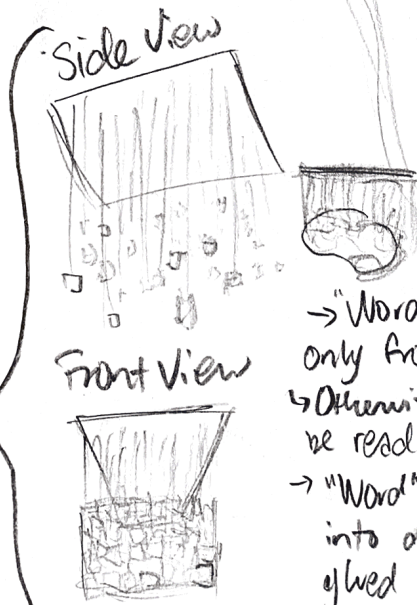

↳ The Brain Perspective

↳ Things will hang off a ceiling & the viewer will have to walk around to make sense of the jumbled up / broken up words.

↳ Anamorphosis !!!

This is now 3D

Side View

Front View

→ "Word" can be viewed only from one angle
↳ Otherwise, the "word" can't be read at all
→ "Word" will be broken up into different pieces & glued to string/wood

The "word"
↳ BABELDOM

4D

The Ears ~~& mouth~~

↳ Create a video that bombards the viewer with visuals and sounds.

↳ "Speak into the mic & see/hear something completely different."

Reflective   **The Hands**

↳ Transparent journal, pieced together by one string

Experimental

↳ "Backwards words"
Processing sketch that messes / jumbles / deconstructs a wall of words!
    ↳ Projection

Notes:
→ language letterforms,
→ Fake words, en english words that mean something else in another language
→ Move around ideas into different applications

#↳ Thumbtacks & car
*↳ Polygons; imperfections

(2D) refined idea ✓

↳ Deconstructed words
placed! on a series
of transparent cogs/
shapes/paper.
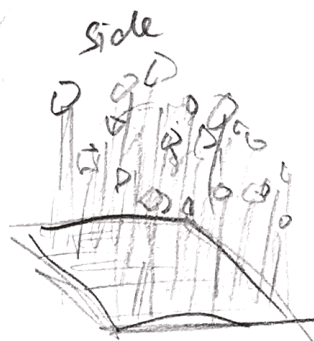

↳ Goal is to find the
write combinations to
create a word!

→Cogs only work if
they're stacked on
top of eachother

} transparent
paper
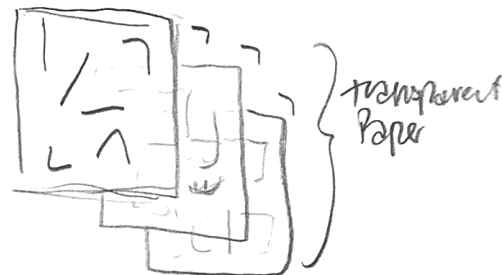

(3D) refined idea ✓

↳ Anamorphic illusion
that shows "Babeldom"
ONLY from one angle.

Side

Front

} Babeldom

TOP

(4D) refined ideas

↳ Film people
*↳ Abstract
**↳ cacophonic sound

Experimental

↳Processing sketch
that shows the randomization
& deconstruction of words

↳ uses other scripts; projected
onto wall

Reflective

↳Transparent journal, pieced
together by one string

*↳ All my notes

*↳ Website !!!

GDes 4 Eldrin

Experimental

↳ An interactive experience where the audience can ask an all-knowing AI <u>any</u> question they may have. This AI is so powerful that it knows everything in the universe's past, present, and future... BUT! You won't be able to understand it.

↳ It can react to you and knows what you're typing, but b/c our human minds are so primitive, we can't possibly interpret what it's saying other than seeing characters we're familiar with.
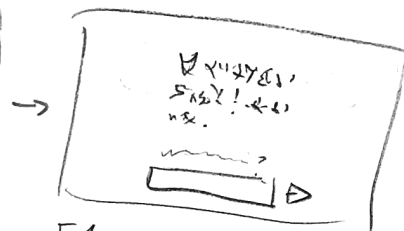

[Screen 1]

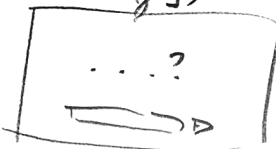

ask something...
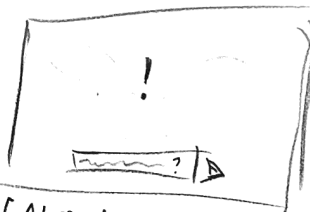

[AI reacts with ! when you type]
First
↳ [AI reacts with ellipsis & question if you're taking too long]

[After you press "send" your question floats up & gets ingested by the AI. It then responds back in gibberish]

Experimental SOUND!

↳ Inspired by patatap.com

↳ Press random keys on laptop to hear voices/sounds and see visuals.
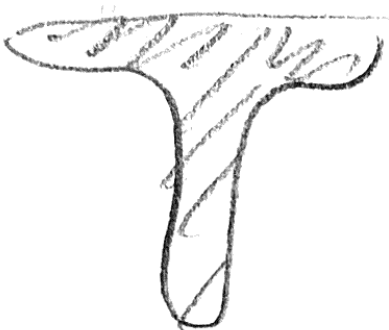

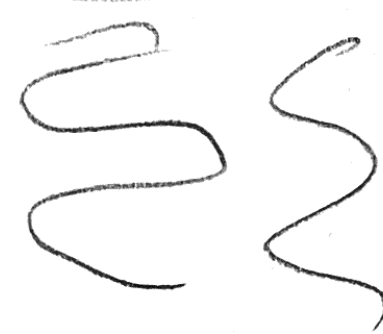

mix of letters, words, sounds

Giles 4 - 3D revisited

- Alexander Calder Mobile

↓

Babeldom → Like the anamorphic illusion, the word Babeldom is broken up into different shapes. But this time, the shapes will be hung up like an Alexander Calder mobile. Each hanging element will represent a letter in the word.
